ABOUT

Experienced Full Stack Software Engineer with expertise in the MERN stack Solutions. Adept at building scalable, high-performance web applications and services. Proficient in both front-end and back-end development, efficient in translating Wireframes and PSD Designs into functional web apps. Known for writing clean, efficient code and collaborate effectively in cross-functional teams. Knowledgeable in user interface, testing, and debugging processes. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

SKILLS

Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, Redux, HTML, CSS, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

Architecture: Clean Architecture, MVC, Repository Pattern

Tools: Git, GitHub, Postman, Figma

Core Concepts: Data Structures and Algorithms

EXPERIENCE

First Economy

May 2025 – Present
Mumbai, India (On-site)

Associate Full Stack Engineer

- Worked on multiple client projects and in-house full stack products across different domains
- Collaborated with designers and backend developers to build **scalable web applications**
- Independently handled end-to-end development of features, from requirement analysis to deployment
- Attended client meetings to understand requirements and provide technical inputs
- Translated business requirements into maintainable frontend features using **React.js and Redux**
- Developed responsive, pixel-perfect user interfaces using **Tailwind CSS**
- Integrated **REST APIs and third-party services** for various application features
- Built and maintained **reusable component libraries** to ensure consistency across applications
- Ensured applications followed **WCAG accessibility compliance** for better usability
- Utilized **AI-assisted development tools** to improve productivity and streamline development
- Worked on-site at **Unico Connect** client locations to support project delivery, collaborate closely with stakeholders, and ensure timely completion of features

PROJECTS

Mahindra Manulife Mutual Fund Website Rebuild | *React.js, Tailwind CSS, Vite, Redux, React Router, Axios, Node.js, MySQL*

- Rebuilt a legacy platform into a **modern role-based SPA** serving multiple user types with a unified codebase
- Developed complex **financial transaction workflows** including SIP, Lumpsum, Switch, Redeem, STP, and SWP
- Developed dynamic **multi-step onboarding workflows** with robust validation and document upload support
- Integrated **third-party services** for KYC, PAN-Aadhaar verification, payment processing, and bank validation
- Designed scalable architecture with **custom hooks, context-based state management, and service layer abstraction**
- Implemented secure data handling with **JWT authentication and encrypted API communication**
- Developed **search, filter, pagination, and dashboard features** for efficient data handling
- Built and maintained **reusable components** ensuring consistency across 200+ screens
- Ensured **WCAG accessibility compliance** and responsive design across devices

Solar Mining Services | *React 19, Vite, Tailwind CSS v4, Strapi CMS, React Router v7*

- Developed a **responsive CMS-driven corporate website** with dynamic product catalog, career portal with resume uploads, and CSR activity pages via Strapi REST APIs
- Architected clean UI/logic separation using **custom React hooks**, shared utility modules, and Container/Presentational pattern for scalable component architecture
- Implemented **security-hardened forms** with XSS sanitization, SQL injection prevention, disposable email blocking, and rate limiting across all form types
- Optimized performance with debounced scroll listeners, **lazy-loaded iframes**, abortable fetch requests, and advanced UI interactions including Lottie animations and Swiper sliders

FixitHub Car & Bike Service Booking Platform | *MongoDB, Express.js, React (TypeScript, Redux), Node.js*

- Implemented secure **JWT authentication** with role-based access control for users and service providers
- Added **real-time chat & audio calls** using Socket.IO and WebRTC for live customer-provider communication
- Integrated **Mapbox** for workshop discovery and roadside emergency assistance with location-based services
- Enabled **Stripe payments** and Cloudinary image storage for seamless transactions and media management
- Developed management tools for service providers, bookings, and user data; built a **review system** for user feedback

SoleLuxury E-commerce Footwear Platform | *MongoDB, Express.js, EJS, Node.js, Razorpay, Nodemailer*

- Implemented **authentication, email verification, and password reset** workflows using Nodemailer
- Developed **cart & wishlist management** for seamless shopping experience with real-time updates
- Built an **admin panel** for product, category, and inventory management with full CRUD operations
- Added **advanced product search** with filters, offers, and category-based discount management
- Integrated **Razorpay payments** with wallet management system for refunds and future purchases
- Used **Multer** for efficient image uploads and storage management across the platform

EDUCATION

University of Kerala	2020 – 2023
<i>BSc in Electronics</i>	Kerala, India
MERN Stack Development	2023 – 2024
<i>Self-Learning Bootcamp</i>	Ernakulam, Kerala
